

Comprehensive Autism Services and Education, Inc. (C.A.S.E., Inc.) is an agency specializing in behavioral, social, and educational interventions for children and young adults with autism. Autism is a spectrum disorder ranging from mild to severe. Because of the varied needs of our clients, C.A.S.E., Inc. offers an individual and integrated approach to working with each child. Below are some of the services we provide:

Consultative Services for Families and School Districts: We provide consultative services that include observation, assessment of behavior and recommendations based on our analysis. We provide training services for parents, teachers, specialists, and staff members. Our trainings include "Autism 101", Friends' Club® Certification, as well as trainings that cover methodologies that have been proven through empirical research to be effective for children with autism. These include 1) Applied Behavioral Analysis (ABA), 2) Discrete Trial Training (DTT), 3) Structured Teaching, 4) Pivotal Response Training (PRT), 5) Social Skills Development, and 6) Facilitated Play trainings. Dr. Norall and her staff are also available to attend IEP team meetings.

Friends' Camp: C.A.S.E., Inc. offers children on the Autistic Spectrum the experience of a day camp that has been modified to their needs in a program called Friends' Camp. This program provides a socially structured environment designed to explore and develop various aspects of social success in a safe and enjoyable setting. They will participate in activities like: A day at the park or beach, a video game party, rock climbing at a local gym, and a slumber party for the teen girls.

Friends' Club®, Junior Friends' Club® and Teens' Club: These therapy groups provide a structured, safe, and enjoyable environment designed to explore and develop the many aspects of social success. Your child/teen will be participating in a small and intimate group of peers with similar needs, where they will be able to learn behavioral boundaries that will help them to be socially successful. These skills will become generalized into other environments.

Gender Talk: These groups provide an opportunity for pre-teens and teens with autism and Asperger's Syndrome to learn that sexual communication is a form of non-verbal communication and to understand how that affects their interactions with others. In addition to an overview about their own sexuality, behavioral boundaries are discussed.

Parent Training: C.A.S.E., Inc. is now offering Parent Trainings! We are pleased to announce that our very knowledgeable and experienced C.A.S.E., Inc. staff will be offering parent training sessions. We will be discussing how to handle difficult behaviors, write social stories, utilizing organizational skills, and other important parenting issues.

Social Coaching: This one-on-one therapy pairs your pre-teen/teen with a college-aged member of our C.A.S.E., Inc. staff who is trained in Applied Behavioral Analysis (ABA). The Social Coach organizes "fun" activities for the teen, integrating social strategies and techniques into the activity. He/she will take your pre-teen/teen out into the community to help generalize social skills.

COMPREHENSIVE AUTISM
SERVICES & EDUCATION

C.A.S.E., inc.

1886 EL CENTRO AVE. NAPA, CA 94558
